

# WILTON PRECISION SCREW VISE

U. S. PATENT APPLICATION NO. 386048

**Revolutionary in the Field of Vises**

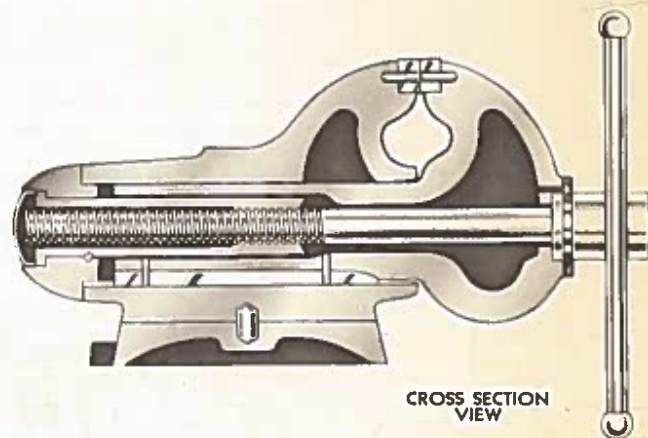

## GUARANTEED FOR ONE YEAR

3. **MOVABLE FRONT**—Is precisely guided (Air Tight) in main body, securely enclosed so that no chips can reach spindle and nut.
4. **VIBRATION ELIMINATED**—The Wilton Screw Vise does away with vibration and is therefore ideal for precision work.
5. **NO DEAD MOTION**—No side twist, no parts to wear out.
6. **WILTON VISE**—Can be used with or without swivel base.
7. **GREATER HOLDING POWER**—Because of the remoteness of the flange of the sleeve-shaped nut from the thrust head and the short distance from the center of spindle to the jaws.

*New*—yes Entirely New in construction, and so designed to give you every essential feature.

The Wilton Vise is the accomplishment of thirty years of experience and constant research.

1. **PRACTICALLY INDESTRUCTIBLE**—Hollow cast ELECTRO STEEL head with inside ribbing for additional strength.
2. **PRECISION SPINDLE**—Eccentrically guided, relieves pressure at strained points. (See cross section illustration.)

8. **INTERCHANGEABLE JAWS**—Of a special high quality steel with fine surfaced serration, is standard equipment. Special Jaws with smooth surface in steel, brass or copper can be had at a small additional cost.
